Mac OS X Leopard instructions for connecting to the SecureHastings wireless network  
September 19, 2008

1. Turn Airport On: Click the Airport Icon at the top of the screen. Click Turn Airport On

![Turn Airport On](image1)

2. Click on the network SecureHastings

![Network Selection](image2)

3. When Prompted by Verify Certificate click Show Certificate

![Verify Certificate](image3)

802.1X Authentication
The server certificate is not trusted because there are no explicit trust settings.
4. Click the Always trust “ias.uchastings.edu” check box and click continue.

5. Type in your computer’s name and password and click ok
6. When prompted, enter your email username and password.

7. The dialog box will change. Be sure to enter your username and password
   Security: choose WPA Enterprise or WPA2 Enterprise
   CHECK: Remember this network
   Click: Add
8. On the Network Properties click the Advanced… button.

9. Drag the SecureHastings preferred network to the top of the preferred network list. Click OK and then click Apply.
10. You will be prompted by the Verify Certificate
   Click: Show Certificate

11. Click the always trust button and click continue
12. Type in your computer’s name and password and click ok

You are now connected to the SecureHastings wireless network. Open Safari or your preferred Internet Browser to browse the Internet.
